FLASH BOOT jumper short the SERIO signal to ground. This jumper is reserved for future use.

SERIAL COMMS

External BUS Connector:
- 40 PIN PICuP BUS
- 26 PIN BitScope POD

General Purpose PROTOTYPE AREA

SERIAL.

Flash Boot jumper allows the PIC to be disconnected from the RS-232 interface circuit. We allow the PIC to be connected to any circuit using an ICE cable. For some prototye applications T0CI may be required as an IO pin.
